PROJECTS

- **STSM** *Visit site*
  Developed a React-based application that allows users to add products and view the list of products they have added. Integrated Firebase for real-time data storage and retrieval, ensuring seamless and dynamic user interactions. Solely designed and implemented the project, showcasing expertise in front-end development and database integration.

- **Portfolio** *Visit site*
  *Designed and developed a responsive portfolio webpage using **Next.js** and **Tailwind CSS**. Incorporated modern and interactive UI elements to create an engaging user experience. Ensured compatibility across various devices with a focus on **responsive design** principles.*

- **Navkar** *Visit site*
  This platform is for Logistics and warehouse Purpose. As a React developer on the Navkar Logistics project, I built dynamic UI components that enhanced the overall user experience. I collaborated closely with my team members to maintain design consistency and optimize performance across devices.

- **Code Biosis** *Visit site*
  CodeBiosis is a modern, professional website designed to showcase the brand's expertise in technology and innovation. I enhanced its user interface to improve aesthetics and usability.
